## 1 Introduction

The Application Account Audit (AAA) audit module provides simple yet affective audit and reminder function and the basic framework for additional application user account auditing features.

In this release **PAM** provides the following application user account audit features:

- ❖ Alerts when new application accounts have been added.
- ❖ Provides a number of checks for user accounts password aging.
- ❖ Identifies terminated employees who's accounts have not been end dated.
- ❖ Alerts when user accounts have been granted access to monitored responsibilities such as Systems Administrator.
