

HOW TO CHANGE A TOAD[®] REPORT MANAGER REPORT NAME AND / OR CATEGORY

LESSON 4

**A step by step guide to changing a TOAD[®]
Report Manager report name or report
category**

**By
Gary Piper**

1 Lesson overview

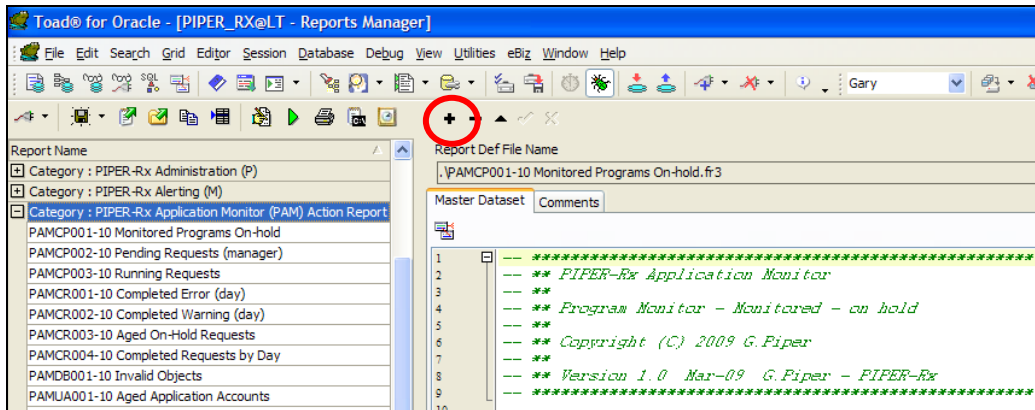

So you either don't like the report name or the category the report is in and you want to either rename the report or move the report to a more suitably named report category. The easiest way to do this and the one that keeps the report name and associated file name the same is to copy the report and then delete the original.

If the new category does not exist then you will have to create the category first. All the steps are outlined below.

2 Create a new TOAD® Reports Manager category

Step 1: Launch the TOAD® Reports Manager

Step 2: Highlight an existing reports category and select the + icon

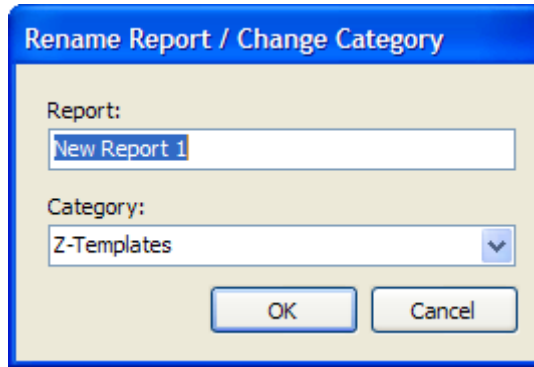

Note: If you highlight a report within a category and select the + button you will create new report under that category.

Step 3: You will then be asked to create a new category name

Overwrite the category name with the new category name. Remember categories are sorted alphabetically.

When you create a new category you will be asked for the report name you wish to create – a category must have at least one report in it. Let TOAD create the report “New Report 1” then you can delete it later when you have your own report in the category.

Tip: When deciding on report names – be aware that reports within a category are sorted alphabetically

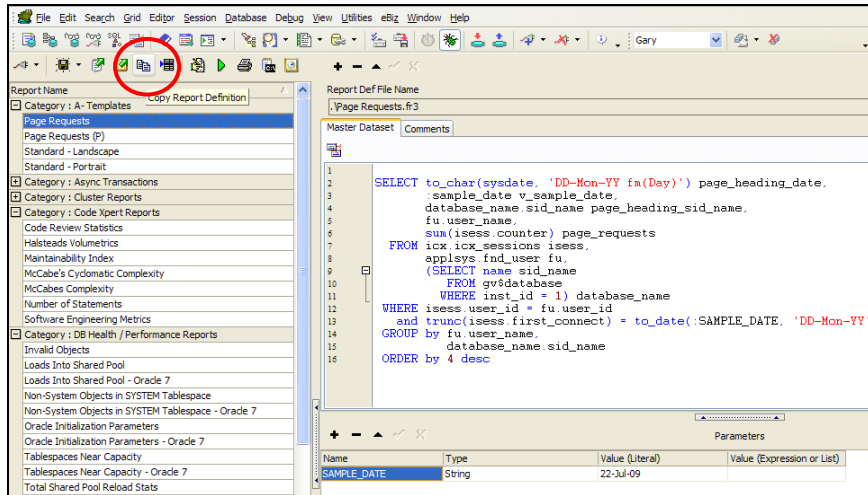

Warning: If you make a mistake with the name you should note that deleting the last report from a category also deletes the category.

Trick: Up to and including TOAD® 9.6 - The category and any changes you have made to report names and any SQL will only be saved when you exit the TOAD® Reports Manager. (This may have been changed in subsequent TOAD® releases.)

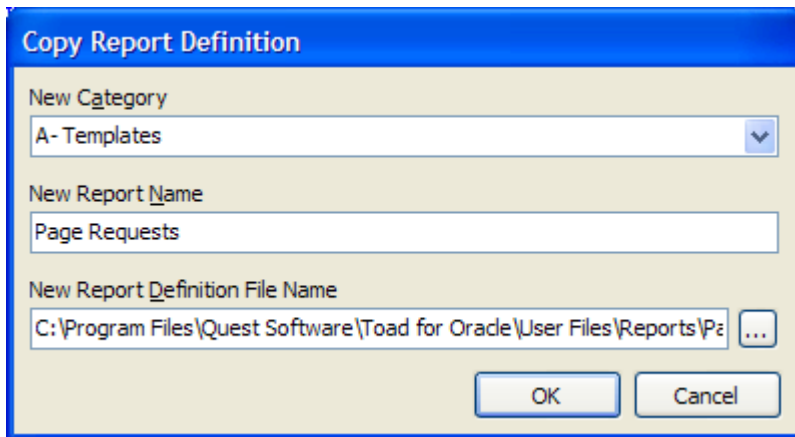

3 Copy / Rename a report

Step 1: Select the report you wish to copy or rename

Step 2: Use the Copy Report Definition button to initiate a copy

You will be presented with the copy Report Definition dialogue box as follows:

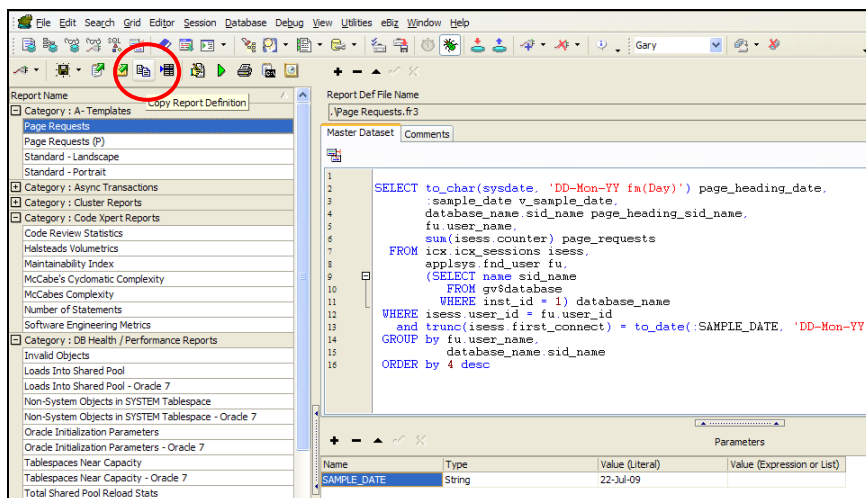

At this point you can rename a report. Don't forget to change the file name to the new name.... then delete the original report once the new report has been created.

4 Move the report to a new category and delete the original report

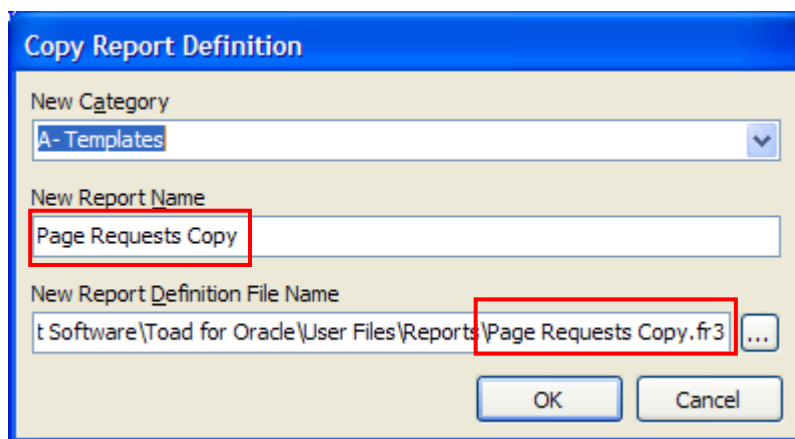

Note: When moving a report to another category, you cannot have two reports with the same name or file name so to move a report to a different category you will also need to change the report name and file name.

Step 1: Select the report you wish to move

Step 2: Use the Copy Report Definition button to initiate a copy

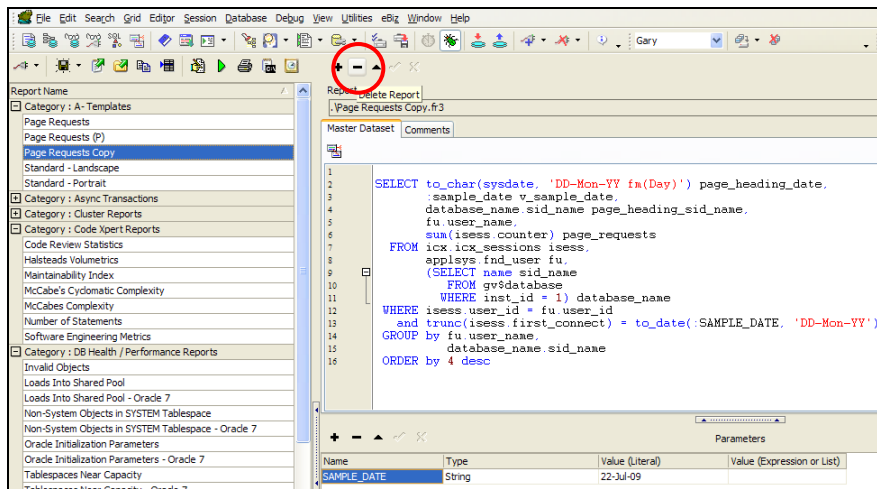

Step 3: You will be presented with the copy Report Definition dialogue box as outlined below. In the example below I have left the report in the same report category but copied the report and note I have also changed the file name.

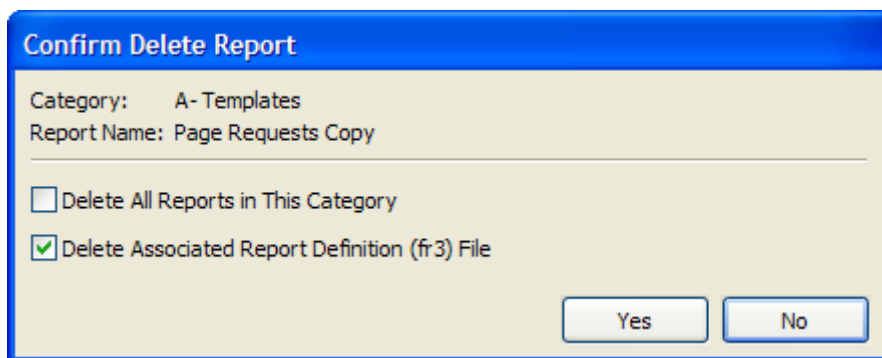

On selecting OK the copy will be created

Step 4: Delete the original report by selecting the report you wish to delete and use the Delete Report button to initiate the delete:

Step 5: You will be presented with the Confirm Delete Report dialogue box...

Make sure you don't tick the "Delete All Reports in This Category" option as it will certainly do this.

Also make sure the "Delete Associated Report Definition (fr3) File" is ticked to remove the associated report file.

Note: There is no recovery once a report has been deleted unless you exported the report in the TRD format.

Trick: Up to and including TOAD® 9.6 - The category and any changes you have made to report names and any SQL will only be saved when you exit the TOAD® Reports Manager. (This may have been changed in subsequent TOAD® releases.)

5 Want to know more?

There is loads more **FREE** information on TOAD Reports Manager reports and also on all aspects of OEBS Application Administration at the **PIPER-Rx** website. I have been working with TOAD Reports Manager since its inception and have had over 20+ years working with Oracle (the product, not the Company) and Oracle E-Business Suite (since Release 5). Since the late 1990's I have spent more time sharing these learnings and the most popular papers and case studies I have presented are available at www.PIPER-Rx.com as well as over 250 TOAD Reports Manager reports and a whole host of Tips and Reports I have used throughout my career.

All information is at the [PIPER-Rx.com](http://www.PIPER-Rx.com) website **FREE** so why not check it out....I hope you find it useful! – **40,000+ downloaders to date can't be wrong!**
